

## SG-SA Stabilizer Agent

 Appearance:  
Powder

SG-SA stabilizer agent is specially designed for gypsum based self-leveling system. The stabilizer disperses in the water quickly and hydrate to form an associative network structure in the system, which increases the system viscosity, prevents

floating, stratification and bottoming, and keeps the homogeneity and stability

### Benefits

- Improved workability
- No influence to final strength
- Enhanced properties
- Effectively prevented bleeding, blackening and delamination
- Excellent anti-segregation
- Good thermal stability and alkaline resistance
- Fine compatibility with other materials
- Friendly to environment

### Dosage

SG-SA is added to improve the suspension stability. Mix and stir evenly.

The recommended dosage varies from 0.03 % to 0.1 % of the blending materials weight.

Make experiments to get the optimized result.

### Specifications

Appearance	Powder
Color	White
Bulk Density	0.8 - 1.0 g/cm <sup>3</sup>
pH	8.0 - 10.0 (20 °C, 1 % solution)
Drying Loss	≤ 5.0 %

### Packaging

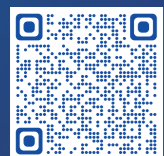

SG-SA stabilizer agent is available in 25 kg bags.

### Storage and Shelf Life

Protect from direct sunlight, moisture and frost. Store in dry warehouse conditions between 5 to 40 °C.

Shelf life in storage conditions is 12 months.

Represented information is based on our current experience. In case of various factors affecting the result, information does not mean legal responsibility. For additional information, please contact us.
