

SS-SN Early Strength Admixture

 Appearance:
Powder

SS-SN Early Strength Admixture is designed to accelerate early strength development of concrete. It improves 1-day and 3-day compressive strength and shortens demolding time.

The product maintains stable performance under normal curing conditions and helps improve construction efficiency for precast and fast-track concrete projects.

Benefits

- Improves 1-day and 3-day compressive strength
- Helps reduce formwork removal time
- Maintains performance under normal curing conditions
- Suitable for fast-track construction

Dosage

Dosage: 1%–3% of cementitious material, recommended 2.0%. Adjust by temp & cement type: higher at low temp, lower at high temp; use carefully in summer.

Add directly as powder; do not dissolve in water. Mixing time \geq 30s. Not suitable for long-term humid concrete if aggregates have active silica/carbonate. Conduct concrete test before use.

Or contact the technical support at info@yschempro.com.

Specifications

Appearance	Powder
Color	White
Residue	\leq 10% on 0.315 mm sieve
pH	7 - 9

Packaging

Net weight: 25kg/bag or according to customer requirements.

Applications

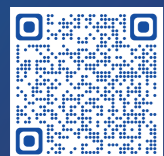

- Cast-in-place: reinforced & prestressed concrete
- Prefabricated parts: hollow slabs, roof panels, beams, columns, trusses, thin-web beams
- Roads, tunnels, bridges, culverts, docks, etc

Storage and Shelf Life

Protect from water and moisture. Shelf life is 12 months under required storage conditions.

This product is non-toxic and non-flammable. Avoid direct skin contact. If contact occurs, rinse immediately with plenty of water.
